### FBI Releases 2014 Crime Statistics

Washington, D.C.—The estimated number of violent crimes in the nation decreased 0.2 percent in 2014 when compared with 2013 data, according to FBI figures released today. Property crimes decreased by 4.3 percent, marking the 12th straight year the collective estimates for these offenses declined.

The 2014 statistics show the estimated rate of violent crime was 365.5 offenses per 100,000 inhabitants, and the property crime rate was 2,596.1 offenses per 100,000 inhabitants. The violent crime rate declined 1.0 percent compared to the 2013 rate, and the property crime rate declined 5.0 percent.

These and additional data are presented in the 2014 edition of the FBI's annual report *Crime in the United States*. This publication, which is a statistical compilation of offense, arrest, and police employee data reported by law enforcement agencies voluntarily participating in the FBI's Uniform Crime Reporting (UCR) Program, also includes limited federal crime reporting and human trafficking data.

The UCR Program collects information on crimes reported by law enforcement agencies regarding the violent crimes of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault as well as the property crimes of burglary, larceny-theft, motor vehicle theft, and arson. (Although the FBI classifies arson as a property crime, it does not estimate arson data because of variations in the level of participation by the reporting agencies. Consequently, arson is not included in the property crime estimate.) The program also collects arrest data for the offenses listed above plus 20 offenses that include all other crimes except traffic violations.

Prior to 2013, the FBI's UCR Program collected rape data in the Summary Reporting System under the category "forcible rape." In 2013, the Program removed the term "forcible" from the title, and revised the definition. The legacy UCR definition of rape is "The carnal knowledge of a female forcibly and against her will." The revised UCR definition of rape is "Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim."

A total of 18,498 city, county, state, university and college, tribal, and federal agencies participated in the UCR Program in 2014. A high-level summary of the statistics reported by these agencies, which are included in *Crime in the United States, 2014*, follows:

- In 2014, there were an estimated 1,165,383 violent crimes. Murder and nonnegligent manslaughter decreased 0.5 percent and robbery decreased 5.6 percent when compared

with estimates from 2013. Rape (legacy definition) and aggravated assault, however, increased 2.4 percent and 2.0 percent, respectively.

- Nationwide, there were an estimated 8,277,829 property crimes. The estimated numbers of each of the property crimes show declines when compared with the previous year's estimates. Burglaries dropped 10.5 percent, larceny-thefts declined 2.7 percent, and motor vehicle thefts were down 1.5 percent.
- Collectively, victims of property crimes (excluding arson) suffered losses calculated at an estimated \$14.3 billion in 2014.
- The FBI estimated that agencies nationwide made 11.2 million arrests, excluding traffic violations, in 2014.
- The arrest rate for violent crime was 156.7 per 100,000 inhabitants, and the arrest rate for property crime was 490.2 per 100,000 inhabitants.
- By violent crime offense, the arrest rate for murder and nonnegligent manslaughter was 3.3 per 100,000 inhabitants; rape (aggregate total of revised and legacy), 6.6; robbery, 29.7; and aggravated assault, 117.1 per 100,000 inhabitants.
- By property crime offense, the arrest rate for burglary was 74.9 per 100,000 inhabitants; larceny-theft, 390.9; and motor vehicle theft, 21.5. The arrest rate for arson was 2.9 per 100,000 inhabitants.
- In 2014, there were 12,656 law enforcement agencies that reported their staffing levels to the FBI. These agencies reported that, as of October 31, 2014, they collectively employed 627,949 sworn officers and 271,263 civilians, a rate of 3.4 employees per 1,000 inhabitants.

**Caution against Ranking**—Each year when *Crime in the United States* is published, some entities use the figures to compile rankings of cities and counties. These rough rankings provide no insight into the numerous variables that mold crime in a particular town, city, county, state, tribal area, or region. Consequently, they lead to simplistic and/or incomplete analyses that often create misleading perceptions adversely affecting communities and their residents. Valid assessments are possible only with careful study and analysis of the range of unique conditions affecting each local law enforcement jurisdiction. **The data user is, therefore, cautioned against comparing statistical data of individual reporting units from cities, metropolitan areas, states, or colleges or universities solely on the basis of their population coverage or student enrollment.**
